SUMMARY

Computer Science Engineering graduate with practical experience in SQL, Python, PostgreSQL, Excel and Power BI. Through academic and personal projects, I have worked on data cleaning, validation and analysis, prepared KPI reports and developed dashboards. I have worked with datasets containing more than 20K and 159K records and developed SQL analyses using CTEs, joins and window functions. I am comfortable working with structured data, identifying patterns and inconsistencies, and presenting findings through reports and dashboards. I am interested in entry-level roles involving data analysis, business analytics, reporting and decision support

TECHNICAL SKILLS

Programming & Data Analysis: Python, Pandas, NumPy, Matplotlib, Data Cleaning, Exploratory Data Analysis, Data Validation

SQL & Databases: SQL, PostgreSQL, MySQL, CTEs, Window Functions, Joins, Subqueries

Business Intelligence & Reporting: Power BI, DAX, Excel, Pivot Tables, Power Query, KPI Reporting, Dashboard Development

Analytics: Statistical Analysis, Trend Analysis, Performance Analysis, Data Reconciliation, Anomaly Identification

Tools: Jupyter Notebook, VS Code, Git, GitHub

PROJECTS

Quick Commerce Operations Monitoring Platform | *PostgreSQL | Python | SQL | Power BI*
https://github.com/AdityaM0910/quick-commerce-operations-analytics

- Designed a **12-table PostgreSQL database** covering customers, orders, inventory, deliveries, payments and related operational data across multiple cities.
- Analyzed **30 days of operational data** to evaluate order volume, delivery performance, SLA compliance and city-level performance.
- Developed SQL queries using **CTEs, joins, aggregations and window functions** to analyze operational KPIs and identify performance trends.
- Used Python and SQL for data processing, validation and analysis of operational records.
- Built Power BI reporting requirements with **KPI cards, target comparisons and daily performance trends**.

Rapido Ride Booking Analytics | *PostgreSQL, Python, Power BI, Excel*
https://github.com/AdityaM0910/rapido_ride_analysis

- Analyzed **20,407 ride records across 20 columns** to evaluate booking and service performance.
- Reconciled row counts across **Excel, Python and SQL** to validate data consistency and identify discrepancies.
- Wrote **20+ PostgreSQL queries** using CTEs and window functions to analyze booking outcomes and service performance.
- Analyzed **Customer TAT (C_TAT) and Vehicle TAT (V_TAT)** to identify performance variations and delays.
- Built a **3-page Power BI dashboard with 15+ DAX measures** to analyze performance by date, vehicle type and location.

IBM HR Analytics | *PostgreSQL, Python, Excel*
https://github.com/AdityaM0910/IBM-HR-Employee-Analytics

- Analyzed **1,470 employee records across 35 attributes** to evaluate workforce and department-level metrics.
- Wrote **38 SQL queries** using joins, CTEs and window functions for workforce, compensation and attrition analysis.
- Used Excel **Pivot Tables and a 6-KPI dashboard** to compare metrics across departments and job roles.
- Analyzed workforce trends and variations to identify patterns and areas requiring further attention.

EDUCATION

Bachelor of Technology, Computer Science Engineering (AI) 2022 – 2026
ABES Institute of Technology, Ghaziabad — AKTU University | CGPA: 8.07/10

CERTIFICATIONS & ACHIEVEMENTS

- SQL (Advanced) — Hacker-Rank
- Selected in the Top 25 teams at college-internal Smart India Hackathon **(SIH) 2025**
- Won Departmental Prize at Code-a-thon 2025.
